

Electric Vehicle Buyer Guide: Chevy Bolt EV Checklist

(A)	Pre-pickup items
	Check all dealership paperwork for the correct name and address for all buyers. Confirm the actual vehicle's VIN matches all of your paperwork. Verify that the vehicle's body color, interior, options, and wheels match what you configured. Bring proof of down payment having been made if sent before, and the final payment, if required. Bring a printed insurance card if possible, if not, bring a digital copy. Download the myChevrolet App.
(B)	Exterior inspection
	Inspect body exterior paint for defects. Inspect under the car for signs of damage or scratches from test drives or transport. Check along all body panels for gaps or misalignment, especially the hatch gap, charge port door, passenger side door / quarter panel alignment. Inspect wheel rims for damage, and all 4-valve stem covers on tires. Inspect all glass. It should look clear with no damage. Check for proper windshield trim installation. Test all doors to ensure they open and close easily. Check all exterior lights for condensation. Inspect the all-weather seals around door gaps and windows for damage and fitment.
(C)	In the driver's seat
	Verify the vehicle is charged to 100% (if required for travel to home destination). Set driver and seat memory system. Check for any error messages on the display screen.
