

Electric Vehicle Buyer Guide: **Kia EV6**

(A) Pre-pickup items

- Check for the correct full name and address on your paperwork.
- Confirm the actual vehicle's VIN matches all of your paperwork.
- Verify that the vehicle's body color, interior, options, and wheels match what you configured.
- Bring written or digital proof of your down payment having been made and the final payment details.
- Bring a printed insurance card if possible, if not, bring a digital copy.
- Download the Kia Connect App.

(B) Exterior inspection

- Inspect body exterior paint for defects.
- Inspect vehicle underside (front and rear) for signs of scraping, or damage.
- Check for any obvious body panel misalignment, or gaps. Especially the hatch gap, charge port door, passenger side door / quarter panel alignment.
- Inspect wheel rims for damage, and all 4-valve stem covers on tires.
- Inspect all glass for signs of distortion, scratches, or cracks.
- Check for proper windshield trim installation.
- Test all doors to ensure they open and close easily.
Test opening and closing of the hatch with auto-close button. The door should latch and seal automatically.
- Check all front and rear exterior lights for signs of internal condensation.
- With all doors open, inspect the weather seals around door gaps and windows.
- Test forward and backward functionality with key fob, i.e. smart park assist (if equipped).
- Test opening hatch and unlocking doors with key fob.

(C) In the driver's seat

- Verify the vehicle is charged to 100% (if required for travel to home destination).
- Set driver profile and seat memory system.
- Check for any error messages on the display screen.
- Make sure the latest system software updates are installed by checking for updates on the system screen.
-

Navigate to the charging station waypoints by pressing EV and make sure they load properly.

- Test wireless phone charger.
- Check all 4 windows to ensure they open and close properly.
- Make sure ac/heat works at full power without strange noises.
- Make sure heated seat / steering wheel / vented seats work (if equipped).
- Test the sound system to ensure all speakers are working (especially the amp).
- Test the steering wheel position controls to ensure proper operation.
- Press the center of the steering wheel to make sure the vehicle's horn works.
- Check windshield for distorted view.
- Test the windshield wipers.
- Test the rearview camera.
- Test the turn signal cameras.
- Check side mirrors for proper operation of folding and position adjustment.
- Check sun-visor operation and mirror condition.
- Check the rearview mirror for any warping or distortion.
- Understand the different drive modes and how to move between them.
- Understand the different regent modes and how the paddle shifters work.
- Test navigation and voice command.

(D) Interior inspection

- Inspect interior seat upholstery, door surfaces, dash, liner & carpets.
- Check the windshield and windows for ripples in the glass.
- Check all seat belts for proper operation.
- Both front seats don't squeak when moving (check all directions of motion).
- Check the rear seats for proper fold-down operation.
- Try to lift the bottom of the back seat to ensure it is securely attached to its base.

(E) Connectivity inspection

- Test USB ports (1 USB-A/1 USB-C in the front, 2 USB-C in the rear).
- Check 12-volt DC receptacle has power.
- Test connectivity of wireless phone charger.
- Test music streaming / phone streaming work and that Sirius trial is activated.
- Test both key fobs to ensure they work.
- Pair your smartphone to your vehicle over Bluetooth.

(F) Lighting inspection

- Vanity mirror lights, Front overhead driver & passenger lights.
- Dome light.
- Driver & passenger door puddle lights.
- All door latch button lights, all door window button lights.
- Steering wheel control lights.
- Glovebox light (check glovebox opening and closing).
- Trunk lights.
- Headlights (low & high beam).
- Front and rear turn signal lights.
- Rear wing/quarter panel puddle light.
- Brake lights.

(G) Charging inspection

- Check the charge port door for proper operation and alignment.
- Check charge port indicator light.
- Ensure the vehicle will accept a charge.
- Test charger on site.
- Test L2L charger and make sure it works properly.

(H) App setup and final items

- Sync the Kia Connect App to the vehicle.
- If more than one driver, add them to driver profile on the app and on the vehicle.
- Setup Electrify America account and load 1,000 kwh of charging code into your profile (from the Kia Connect app there is a code to add into the Electrify America app).
- Setup Verizon Wireless hot spot trial and connect your phone to it.
- Verify any additional items that were specified as being included with purchase.
- Make sure you have copies of all paperwork necessary for good documentation of your purchase, including a copy of your signed purchase agreement.
